

Monday 27th April 2020

Hello Year 4,

I hope everyone is well. It was really lovely speaking to you all on the telephone this week. There were some really great stories about what you have been up to so far.

So what does our home learning page have in store this week...?

Well, we have some St. George activities in the R.E. section of the home learning page.

In the science section we are looking at changes of state – can you change the state of some water to make it a solid? Is this change reversible? Can you make chocolate into a liquid?

In English we are working on our grammar this week. There are activities about conjunctions, fronted adverbials, expanded noun phrases and some reading challenges too!

Maths - we are continuing with the White Rose fractions unit and also looking at your time telling skills. Telling the time is an important life skill. Now is the perfect opportunity to improve your skills.

For Geography we are working on map skills this week. Can you name and plot all the seas, oceans and continents onto a blank map? Have a look at Google Earth if you can and explore our amazing planet.

I have also added an art challenge this week linked to St. George. I am looking forward to seeing your wonderful creations.

Have fun, stay safe and I will be in touch again next week.

Mrs Roberts
