

Monday 1st June

Hello Y4,

Wow! How did it get to be June already? I hope you have all had a fabulous half term and had a good rest. There is lots in store on our home learning page this week.

English – have a look at the image of a mystery staircase and write an exciting story about where it might lead.

Maths – this week we will be recapping adding and subtracting fractions. There is also a times tables super challenge to try.

Science – is all about birds this week. What kinds of birds have you seen in your garden and out and about on your walks and bike rides? Can you identify them? Can you do some research about a particular bird and create a fact file all about them?

R.E. – This week we are looking at our class Saint, St. Peter. Watch the video about him and create a piece of artwork all about him.

Geography – This week is a challenge! Can you name the counties of the UK? Can you name more than your parents? Who will win?

What makes you smile? Last week, when I was preparing the classroom for our eventual return I made the start on a lovely display to cheer us all up. Can you send in some pictures of you doing your favourite activities or a photo of a piece of your favourite thing for our display. Send them to the school email and I will print them and put them onto our display. I am looking forward to seeing your wonderful photos.

Keep well and stay safe,

Mrs Roberts
