

Monday 22nd June,

Hello Y4,

I hope you are all keeping well. I am hoping to do an online lesson with you all next week. You should get an invite from the office to join me on Microsoft Teams for a lesson so listen out for that invite.

On the home learning page this week we have:-

Maths – There are some active maths activities this week as well as the White Rose activities which are all about money.

English – A funny little video called Teeth. Have a look at the activities that go alongside this video.

Science – This week we are exploring food chains. Have a look at the links and then try drawing your own version of a food chain.

Creative – We are exploring how to make musical instruments this week. Have a look at the ideas links before creating your own.

RE – Who is your favourite saint and how do they inspire you? Create a fact file and some artwork to show this.

I am looking forward to seeing your faces on screen next week. Take care!

Mrs Roberts
