

**Hello Year 4.**

**Happy Easter everyone.**

I thought I'd write your weekly letter slightly differently this week, being as it is Easter.

This week on our home learning website I have uploaded lots of web-based activities for you to try. <https://sites.google.com/view/y4-home-learningstjoca> .

English. - There is a great website called Pobble.com that gives you pictures to write stories about. I have also uploaded a link to audible.com that allows you to download free stories to read and a link to David Walliams' Elevenses – here he reads extracts from his books at 11am every day.

Maths – I have posted a link to the White Rose Maths Hub. Here are some lessons continuing our work on decimals and fractions.

Science – BBC bitesize discusses solids, liquids and gases. Can you create a poster explaining the properties of each?

Geography – there are different online resources for you to learn all about the formation of a river.

R.E. – I have left a link to the C.A.F.O.D. website for some fun and games.

I hope you enjoy working on these activities, don't forget to keep active, stay safe and enjoy time with you family.

If you need any help, just send an email and I'll be in touch.

Mrs Roberts
