

Monday 6th July,

Hello Y4,

It was lovely to see your lovely faces again in our Teams lesson last week. You all shared your ideas beautifully. Remember your task for the final meeting on the 15th July. What is your favourite Year 4 memory?

On the home learning site this week we have lots of great things to do...

Maths – We are looking at geometry this week, with work on shapes and angles.

English – The Catch – this is a great, multicultural video and there are lots of related resources to try.

Science – We are looking at classification keys. How are animals sorted out into their different categories?

RE – Go and check out the CAFOD website and see how they are encouraging a 'Summer of Hope' in these unusual times. There are some lovely activities for you to try out.

Creative – Create a piece of work about your favourite Y4 memory. Be ready to share your lovely work on our Teams meeting.

Remember to keep active and if you are going out, remember to stay safe and keep your distance and most importantly, have some fun!

Mrs Roberts
